

OPTIMO PLUS

TECHNICAL SPECIFICATION

Type: S1P
 Additional properties: M - metatarsal protection
 Standard: PN-EN ISO 20345:2012
 Sizes: 35-48

DESCRIPTION

Velour leather shoes equipped with a metatarsal protection element made of a composite material resistant to an impact with an energy of 100J. Thanks to the contoured insole that adapts to the shape of the foot, they provide the user with comfort throughout the working day. The ATF technology used in the manufacturing process prevents bacterial growth and provides antibacterial and antifungal protection, while Ultra-Fresh helps to keep footwear fresh and clean by eliminating unpleasant odours. The safety component are ideally combined with high-quality materials to provide both protection and comfort for the feet. Model available in S1P version.

Upper: velour leather
Insole: moulded, anti-static + shock-absorber
Outsole: single-colour
Lifter: composite
Sizes available: 35-48
